

Perfins on the 3¢ "Stuart" Washington of 1932

By Louis E. Repeta (#1481)

I have always been attracted to plate varieties and the technical side of stamp collecting. Plate varieties and EFO acquisitions started to become too costly. During the summer of 1974 I began to specialize in collecting all forms of the 3¢ "Stuart." It has been a magical journey. Specializing in a single issue or stamp series is not simply a self-imposed limitation in a field of interest, but a decision to concentrate on a specific subject.

Starting January 1, 1932, the country began to celebrate the Washington Bicentennial Year and in commemoration of this event a set of postage stamps was issued. This series consisted of 12 stamps ranging in value from ½¢ to 10¢. Each vignette depicted the likeness of George Washington reproduced from portraits by well-known artists. The most popular and most famous of all the Washington portraits was the unfinished portrait painted from life in 1796 by Gilbert Stuart. It was used on the stamp for the first class letter rate of 2¢. The portrait is often called the Athenaeum portrait because it was owned by the Boston Athenaeum, a private library. The portrait was later moved to the Boston Museum of Fine Arts where it now hangs.

The 2¢ Stuart Washington stamp was designed by Clair Aubrey Huston. The vignette was engraved by John Eissler and is considered to be the finest reproduction of Washington's

likeness. The frame was engraved by Edward M. Hall.

In early 1932 the Senate and House of Representatives were concerned about the Post Office deficit and argued about raising the postage rates as a solution. The House recommended an increase of the 2¢ first class rate to 3¢ and the Senate proposed an increase to 2½¢ supplemented with an additional general sales tax. While this debate was current several models for a 2½¢ stamp were made. One was based on the Stuart portrait and the other based on the right profile bust of Washington by Houdon. In addition, four 400-subject rotary stamp plates for the production of the ½¢ Bicentennial were made in anticipation of a possible postage rate increase from 2¢ to 2½¢. These plates never went to press.

Agreement was finally reached. The opponents of the general sales tax won out. The 1932-33 Revenue Act (Title VIII, sec. 1001) was signed by President Hoover on June 6, 1932, enacted into law and the first class letter rate was increased from 2¢ to 3¢.

A new 3¢ definitive stamp, identical in size and design to the 2¢ Washington Bicentennial stamp, except for a change in the denomination and the omission of the dates was to be issued. To expedite the manufacture of the 3¢

"Stuart," a transfer roll, number 1719, was made from the 2¢ Washington Bicentennial P.O. die number 829. The numerals and dates were removed, yielding a non-denominational transfer roll. This modified design was entered on a soft die block and new numerals and ribbon ends were engraved. The new die was then hardened and assigned number 851 by the BEP. Eighteen 3-subject transfer rolls were made and all were used to produce the 3¢ Stuart plates.

The facts that contribute to make this stamp outstanding are (1) the 3¢ Stuart design was taken bodily from a commemorative stamp; (2) both stamps represented the first class postage rate during the same year; and (3) the 3¢ Stuart was issued as the Bicentennial Celebration Year was in progress. Therefore we have a definitive stamp that embodies all the finest qualities of a commemorative and a regular issue.

I would be pleased to hear from members who can add items to the checklist that follows. I can be reached by mail at P. O. Box 16048, Charleston, SC 29412 or by e-mail at Writterro@aol.com.
